Control Guide Quick Report

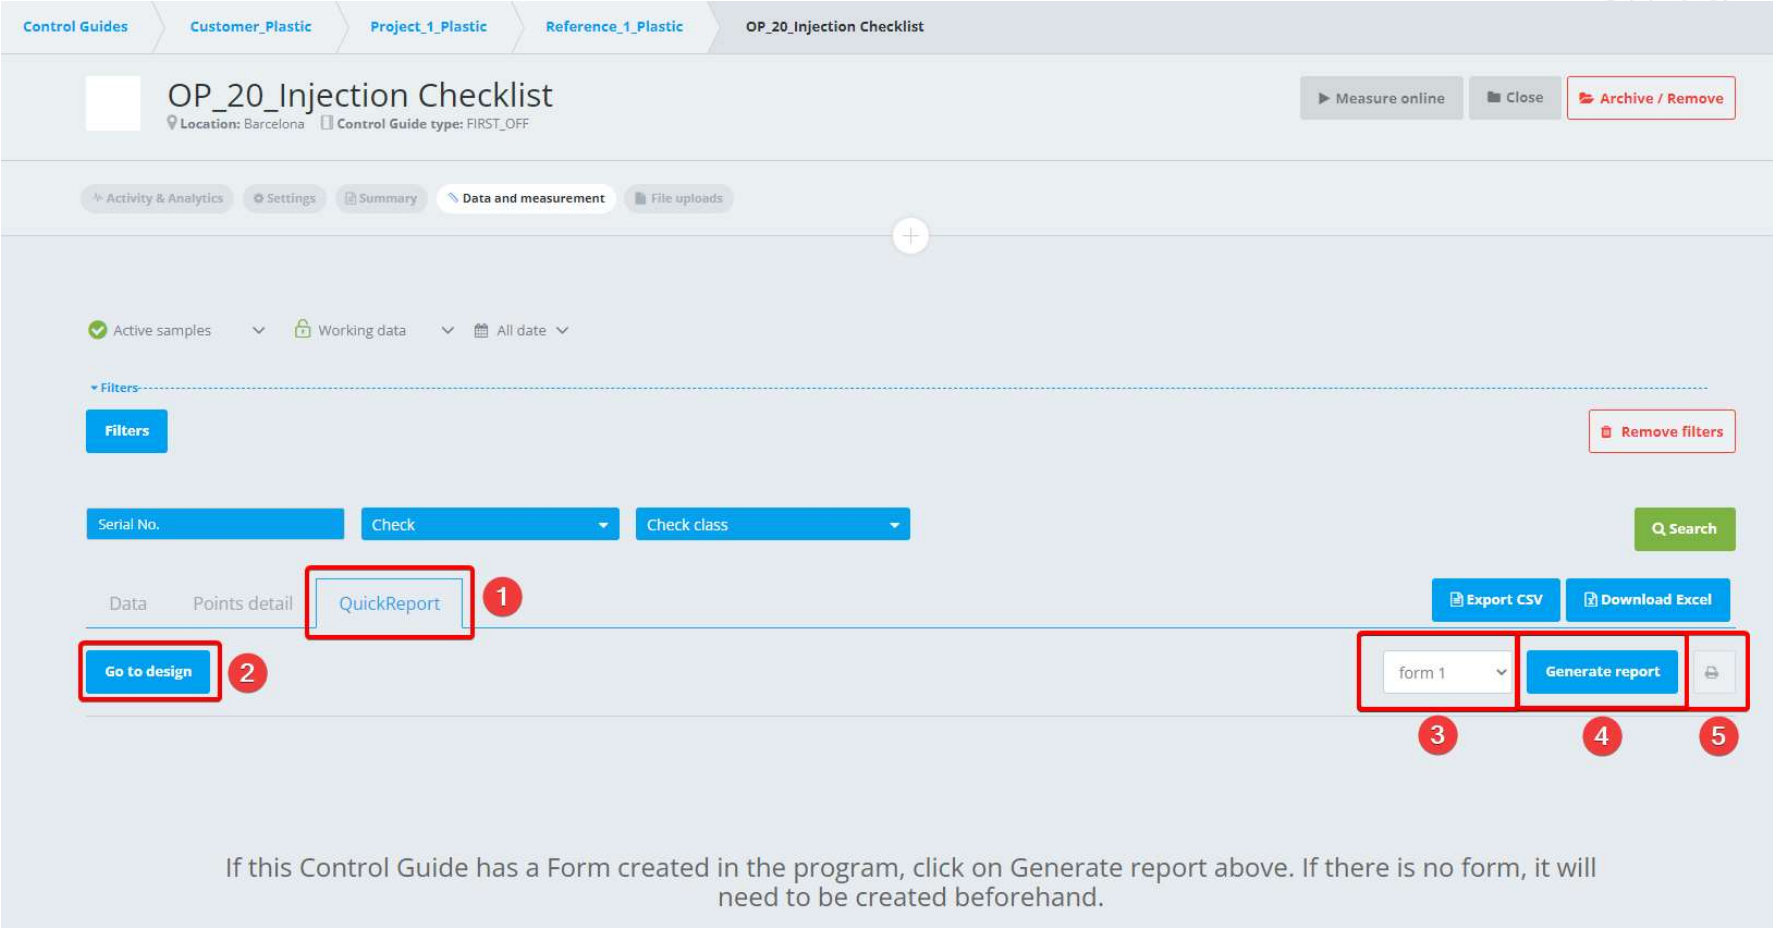

When accessing Data&Measurement from any Control Guide, the user is provided with different data reports.

The Quick Report is one of them, it is based on the structure of each form of the program, obtaining the introduced data. As in all Kapture.io reports, the user can apply different attribute and date filters to select exactly the data to be shown in each report and easily print the result.

Control Guide Quick Report

Control Guides > Customer_Plastic > Project_1_Plastic > Reference_1_Plastic > OP_20_Injection Checklist

OP_20_Injection Checklist

Location: Barcelona | Control Guide type: FIRST_OFF

▶ Measure online | Close | Archive / Remove

Activity & Analytics | Settings | Summary | Data and measurement | File uploads

Active samples | Working data | All date

Filters | Remove filters

Serial No. | Check | Check class | Q Search

Data | Points detail | QuickReport | Export CSV | Download Excel

form 1 | Generate report | Lock icon

If this Control Guide has a Form created in the program, click on Generate report above. If there is no form, it will need to be created beforehand.

Quick Report

1. Quick Report: Loads the quick report.
2. Go to design: Redirects directly to the forms area. This way, the design can be modified if necessary.
3. Form: selects a form.
4. Generate report: Loads the form report.
5. Print: Generates a PDF of the quick report based on the design made in the form area. This report will represent the data (all filters that have been applied will be respected).
